About

Full-Stack developer since 2015, freelancing since 2026. I've mostly worked on headless e-commerce (Commercetools) and on web and mobile apps in TypeScript.

Quality matters a lot to me: readable code, tests, code reviews, CI/CD.

Side projects: TeamFest, a volunteer management app for the Les Mouillotins festival (Nuxt, NestJS, PostgreSQL), and Pokémon GO Laval, a Discord bot, API and website for the local community since 2017.

Outside of code: festivals, music, video games, card games, gardening and DIY.

Tech stack

React · Next.js · Node.js · TypeScript · commercetools · Nuxt · Docker · GitLab CI · GCP · PostgreSQL · Terminal · C#

Alexandre Audebeau

SENIOR FULL-STACK FREELANCE DEVELOPER

Work experience

Full-Stack Developer (freelance)

2026 - present | Audebeau SASU, Laval

- Groupe ETAM mission (Clichy): rebuilding the e-commerce site, from Salesforce Commerce Cloud to headless Commercetools
- Serverless BFF on AWS Lambda (Node.js, TypeScript), ContentStack and Algolia integration, CI/CD

Part-time lecturer

2024 - present | IUT de Laval, Laval

- Algorithm quality (3rd-year BUT Computer Science), Java user interfaces
- Databases: introduction (SQL Server) and new paradigms

Full-Stack Software Engineer

2021 - 2026 | Orkester (formerly Technology Everywhere), Laval

- Richemont (Cartier, IWC, Piaget…): React catalogue app, rebuilt in Next.js (SSR)
- Arturia: e-commerce site rebuilt from scratch (Commercetools, NestJS, Nuxt, Strapi, GCP/Kubernetes)
- Wojo: React Native app and Next.js / NestJS website (Stripe, Google)
- Hiring and mentoring juniors, interns and work-study students

Software Engineer

2017 - 2020 | Agilitic, then Interfacto after the acquisition, Laval

- Kibati, field-service scheduling for construction trades: Elm web app, Elixir and F# backend, Xamarin/C# mobile
- CQRS architecture (EventStore, PostgreSQL); design, deployment and customer support

Web Developer

2015 - 2017 | Aliznet, Laval

- IBM WebSphere Commerce e-commerce sites (Java/JEE) for Millésima and Bongénie
- Maintenance and improvements on client projects
- Moved the team from SVN to Git/Gitflow and trained them

Education

Master's degree in Computer Engineering

2012 - 2015 | Institut d'Informatique Appliquée, Laval

BTS in Business Computing

2010 - 2012 | Institut d'Informatique Appliquée, Laval
